TEKEVER strengthens its footprint in Ukraine with appointment of Kateryna Bezsudna to lead local expansion and innovation

The move consolidates the company's long-term commitment to the country, where it has been operating since 2022, and reinforces its strategy of developing innovation hand-in-hand with the Ukrainian Armed Forces.

TEKEVER, Europe's leading developer of unmanned aerial systems (UAS), today announced the appointment of Kateryna Bezsudna as Director of TEKEVER Ukraine. The move consolidates the company's long-term commitment to the country, where it has been operating since 2022, and reinforces its strategy of developing innovation hand-in-hand with the Ukrainian Armed Forces.

Since its arrival in Ukraine, TEKEVER has flown thousands of missions with its AR3 and AR5 systems, accumulating over 10,000 AR3 flight hours. Continuous feedback from the front line has driven more than 100 incremental evolutions of the AR3, culminating in the unveiling of the AR3 EVO in September 2025 – a system born out of battlefield experience, and designed to deliver unmatched flexibility across land and maritime environments.
